## Overview

*WBCONFIG Configuration editor for Warbirds III(™)* is a utility that will assist the user on making the settings to their "init.cfg". We hopefully have designed this so it is easy to easy and that it will assist the newbie on how to configure the file.

## Configuration

This is no special configuration that is needed because there is not registry entries made

## Menu Layout

## Resources

## Credits

*WBCONFIG Configuration editor for Warbirds III(™)* is designed and created by **Xavier "Warfly" Cho** and **Jim "Hawk" Ray**. Xavier Cho is an outstanding Java programmer who made this program possible on both the MAC and PC platforms and Jim Ray is the one who inspired it.
